Arnold Schwarzenegger
Governor

July 7, 2009

Mr. Thomas D. Gallacher
Director, SSFL – Environment, Health & Safety
The Boeing Company

The Boeing Company

- 2) Based on Figure 3-1, the area with the highest copper and lead concentrations in soil in the outfall 008 area appears to have been excavated during the perchlorate cleanup. Please explain the need to re-excavate.

Summary of Boeing's Response: Prior excavation focused on perchlorate, the elevated metals remained in the sidewalls of that excavation

Board staff comment: Boeing response satisfactory.

- 3) It is indicated in Appendix B that rainfall runoff carries approximately 1000 tons of soil through outfall 008 each year. Based on field evidence, verify the reasonableness of this estimate.

6) The Final Work Plan does not adequately describe radiological monitoring during cleanup.
